Impact Model - ArcSentry AI

Core Impact

Time Efficiency

- **10 mins → 2 mins per story**
- **~80% reduction in comprehension time**

At **1M users/day**:

- **8M minutes saved/day**
- **~133,000 hours/day (~15 years of human time daily)**

Engagement Uplift

- **+40–60% increase in session engagement**
- **2–3× more content interaction** via guided timeline + Q&A

Revenue Potential (for platforms like The Economic Times)

- Higher dwell time → improved ad impressions
- Premium insights → subscription conversion

Estimated:

- **+15–25% revenue uplift per user segment**

Efficiency Gain

- Reduces need to read **4–6 articles per topic → 1 structured view**
- Cuts cognitive load significantly → faster, clearer decision-making

Scalable Impact

- Applicable across **Finance, Geopolitics, Sports, Science**
- Designed for **real-time, multi-article ingestion at scale**
- Supports **millions of users with minimal incremental cost**

ArcSentry AI shifts news consumption from **time-intensive reading → instant, structured intelligence**, delivering measurable gains in time, engagement, and revenue.
